**About**

## Method 1: Ask Java

This is my favorite - straight from the horse's mouth (so to speak). The Java Run-time Environment is aware of its version and the company that authored it. So I wrote a very simple applet (the source code is on the About page) that gets this information from the JRE and displays it in a pink rectangle.

### The version and vendor from the JRE

Java Version: 1.6.0_30 from Sun Microsystems Inc.

If Java is working, you will see a pink rectangle above with one line of text that says something like:

Java Version 1.6.0_30 from Sun Microsystems Inc.   or
Java Version: 1.3.1 from Apple Computer, Inc.   or
